EXPERIENCE

MINDGIGS

Dec 2025 – Feb 2026

Python Developer Intern

Peshawar, Pakistan

- Engineered REST APIs using Pydantic for validation and async endpoints to optimize backend throughput.
- Integrated Intel® Small LLMs for probabilistic features and AI-driven data processing capabilities.
- Developed high-efficiency scraping pipelines with Docker containerization and Git-driven workflows.

PROJECTS

Async Web Scraper

Python, PostgreSQL, TypeScript, Docker

[Live Demo](#) • [Source Code](#)

- Reduced scraping latency by 85% via a concurrent AsyncIO pipeline processing 15+ sources simultaneously.
- Maintained a 99.2% success rate by implementing custom rate-limiting and exponential backoff for Groq LLM integration.
- Developed a TypeScript monitoring dashboard with 3s interval polling, reducing manual verification overhead by 90%.

VaultGuard

Python, PostgreSQL, JavaScript, Docker

[Source Code](#)

- Architected a stateless auth system with FastAPI and JWT refresh tokens, eliminating session-based server memory overhead.
- Strengthened security via Argon2id and Fernet encryption, increasing brute-force cost by 50x over standard SHA-256.
- Secured 12 REST endpoints with per-user encryption keys and automated 15-minute token rotation.

EDUCATION

University of Agriculture, Peshawar

Oct 2024 – Oct 2028 (Expected)

Bachelors of Science in Computer Science (BSCS)

CGPA: 3.7 / 4.0

Core Coursework: Programming Fundamentals, Data Structures & Algorithms (DSA), Object Oriented Programming (OOP), Database Systems

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, SQL (PostgreSQL)
Backend	FastAPI, SQLAlchemy, Pydantic, Asyncio, RESTful API Design
DevOps & Tools	Docker, Git, GitHub, pgAdmin, Linux
Core Concepts	DSA, Concurrent Programming, Authentication (JWT), Encryption

CERTIFICATIONS

CS50X: Introduction to Computer Science from Harvard University

Issued Feb 2026

CS50P: Introduction to Programming with Python from Harvard University

Issued Oct 2025
